Problem statement

Credibility problems

Monitoring project progress

Marketing problems

Choosing consultation

Geographical distance

Objectives

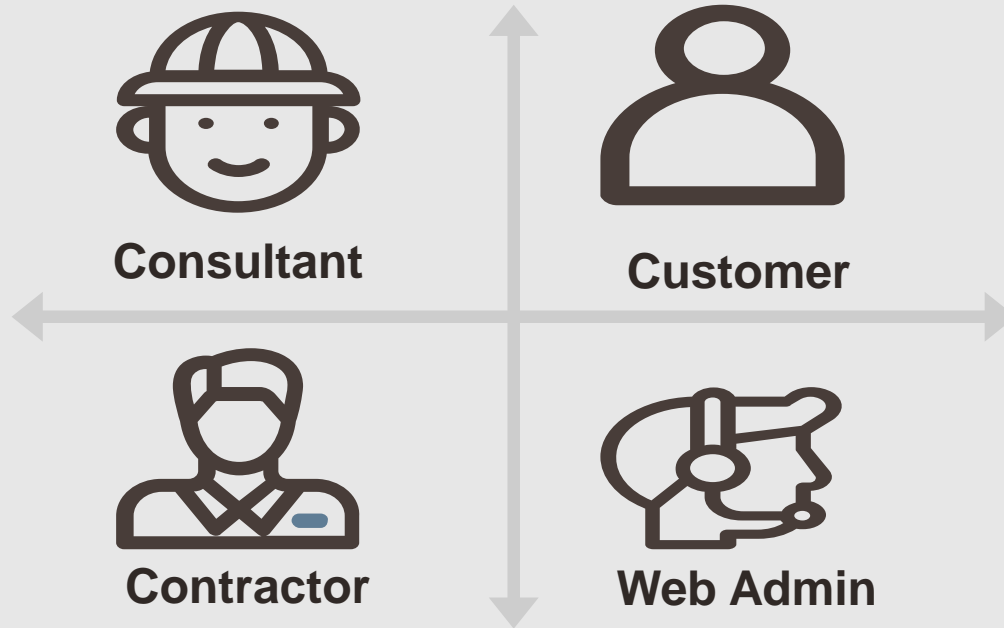

Follow the project
Follow customer's data
manage users
communication between
companies and technical
support staff
view old work templates
reduce time and effort

scheduling an appointment
for a visit in the office or the
project site.
Receiving requests for
training in a specific center
by new engineers.
Building the visitor's
confidence

Stakeholders

The image features two decorative, dark gray wavy lines in the top corners. One line starts at the top left and curves downwards towards the center. The other line starts at the top right and curves downwards towards the center. They are positioned symmetrically around the central text.

System Analysis

Functional Requirements

Client:

- Sign Up
- Log in
- Browse old projects
- Request consultation
- View project progress
- Request appointment
- Add evaluation
- Browse available services
- Request service
- Log out

Functional Requirements

Consultant:

- Sign Up
- Log in
- Add new project
- Update project progress
- Update available dates
- View and response to appointments
- Log Out

Functional Requirements

Contractor

- Sign Up
- Log in
- Add new service
- View and response to service requests
- Log out

Functional Requirements

Web Admin

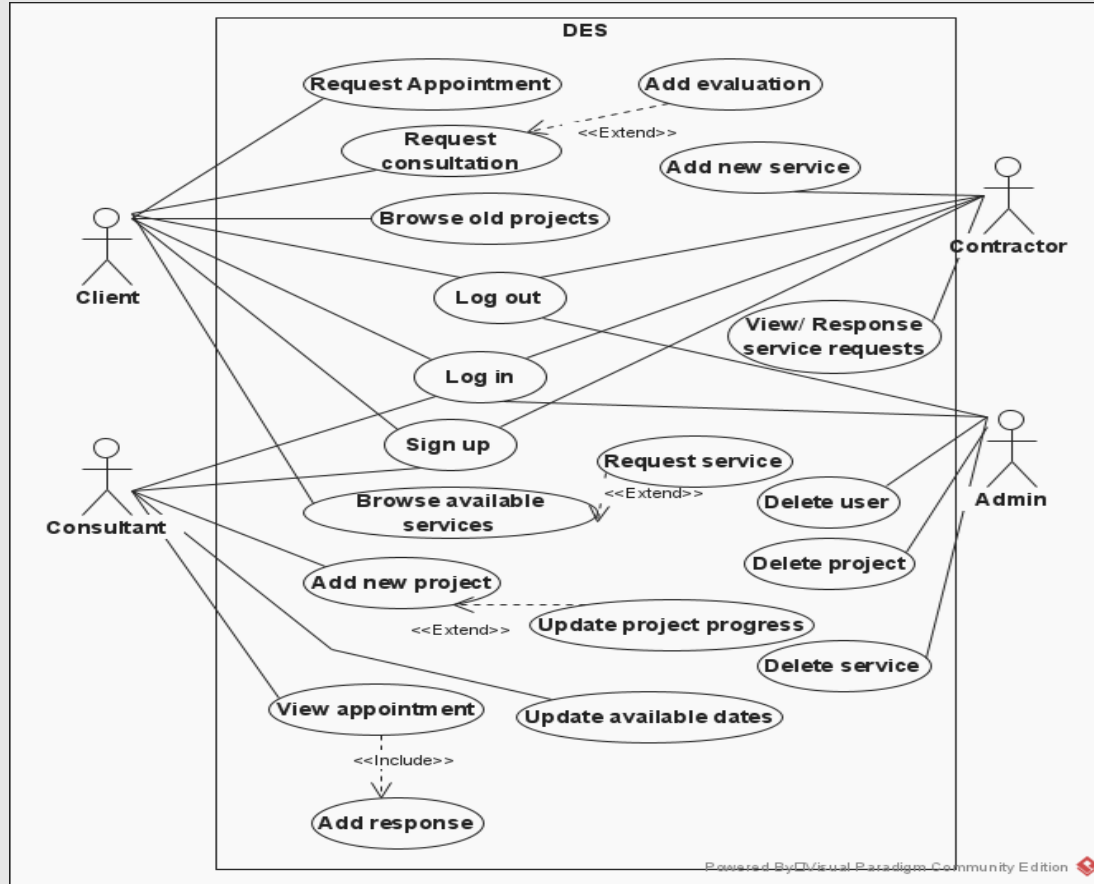

- Log in
- Delete service
- Delete user
- Delete project
- Log out

06

Conclusion

Conclusion

The design study for a digital engineering consultancy site was presented

The project stakeholders was identified

The design of this site was completed according to several stages

- Functional requirements UML tools
- ERD / database
- User interfaces

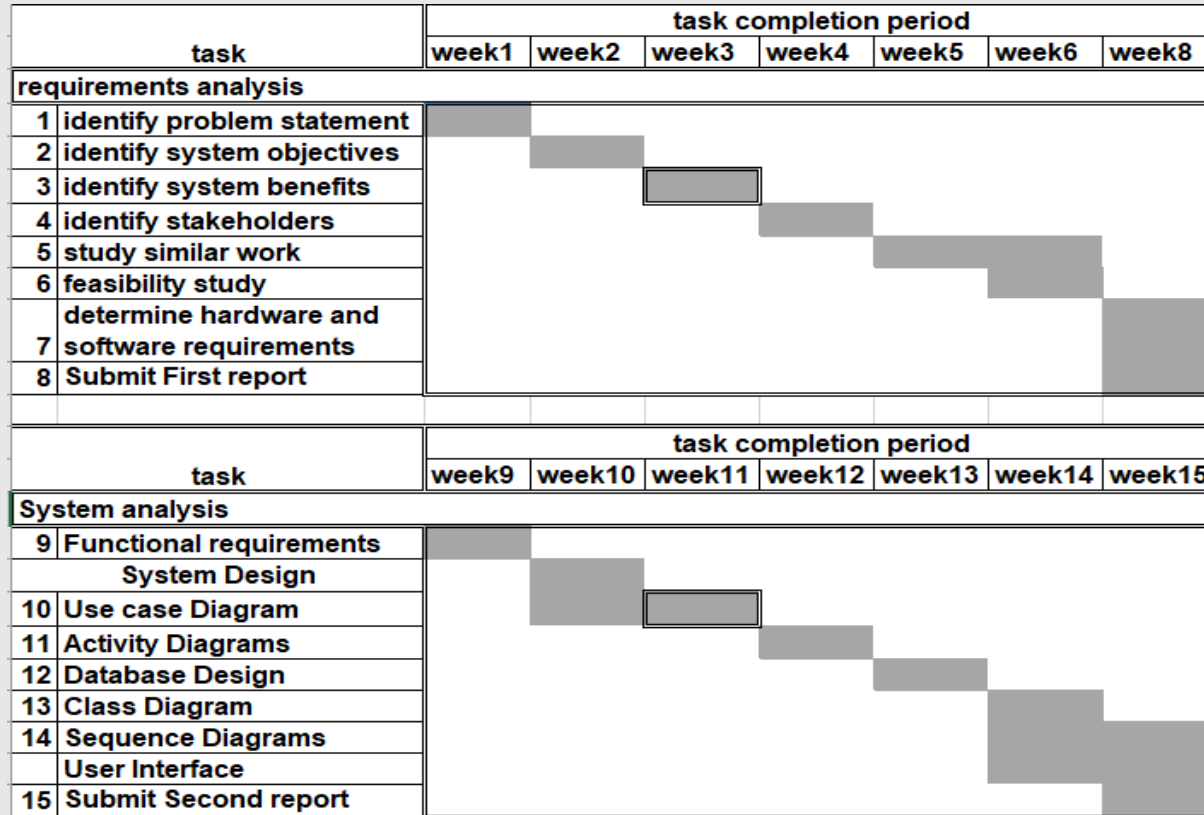

Future work

System implementation

System testing

System deployment

Gantt Chart
